

Informance – *the* Qlik® partner for accountancy firms

We provide the Qlik platform to accountancy firms who want limitless business intelligence that answers any question about their business.

Uncover unexpected insights and make more informed decisions.

In today's fast-moving digital age, accountancy firms need to use the value of their data to drive customer service, foster loyalty and enhance profitability.

To stay ahead of the competition, firms need the business intelligence tools in place to improve business reporting by enabling users to extract and analyse data from multiple sources to find meaningful insights and make meaningful decisions.

Informance is a Qlik Elite Solution Provider who delivers the Qlik platform to accountancy firms who want to streamline their practice and increase workflow visibility, save time and money and improve customer service.

We have developed multiple Qlik dashboards and apps that enable accountancy firms to extract, consolidate and analyse data from any source and enhance knowledge sharing across the firm for better fact-based decision-making. Our Qlik dashboards enable firms to improve efficiency and increase profitability by accelerating business processes and improving business insight and management.

Qlik provides firms with a dynamic view of all their business information and improves business agility by enabling firms to manage key performance indicators better. They empower users by giving them the facts they need to monitor their performance and recognise business development opportunities as they arise which means decisions are made on facts not assumptions.

Qlik extracts data from multiple sources, all at the same time, and answers any questions about any area of the business instantly. It offers analysis on demand by providing users with real-time information displayed through intuitive, role-focused dashboards that enable users to perform detailed analysis at the click of a mouse.

Qlik from Informance enables accountancy firms to consolidate, search, visualise and analyse all of their data, no matter where or how it is stored for unprecedented business insight.

Perform better. Deliver better.

For accountancy firms to improve decision making and productivity and gain a deeper understanding of their clients they need instant access to key data and complete visibility throughout the business. It's only with the right business transparency, accuracy of data and speed of decision-making that firms can truly identify business opportunities as they arise.

This is where Qlik thrives as it speeds up the reporting process and analyses business information accurately and in real-time enabling everyone within the firm to generate unique insight and drive business growth.

Qlik integrates all your systems and transforms data in strategic information for planning, decision-making, financial monitoring and performance management.

Our Qlik accountancy dashboards are powerful yet incredibly user-friendly. They enable users to search across their data, ask questions and pursue insights either on their own or collaboratively to uncover hidden trends and make important discoveries.
